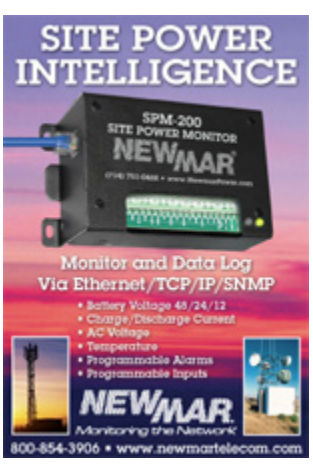
Powering the Network

Coming Soon!

A new *Powering the Network* catalog is in the final stages of production and will make its debut at:

IWCE

Come on by booth 5072 to see what's new!



Web-enable and integrate intelligence to any site's AC and DC power system for 24/7 monitoring, alarm notification, and data logging of vital electrical functions.

To learn more, visit us online or contact Jeff Wright by e-mail or call 800-854-3906.

Dear Eric,

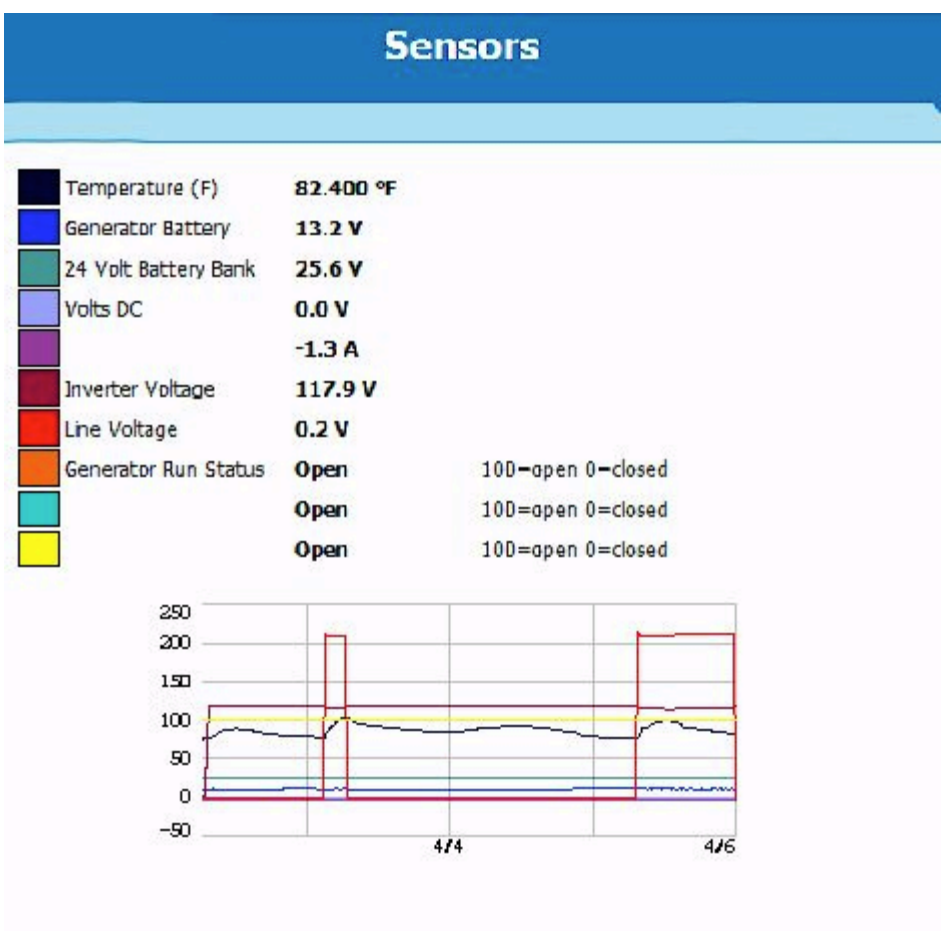
Welcome to the Newmar News; a quick and easy read, yet presenting relevant DC Power application ideas for Land Mobile, Cellular, Broadband, and Microwave wireless networks. And on occasion, some helpful DC Power tech tips.

We appreciate you taking a little time out of your day to read what is happening while Newmar powers the network. Don't forget to scroll down to the bottom of the newsletter to request your free Newmar Screwdriver.

Regards,
Eric Harmon

Multi-Site Software Simplifies Remote Site Monitoring of 100 Sites

Multi-site console software for the SPM-200 enables system network monitoring of up to 100 remote sites with a single web page based interface.



The The Site Power Monitor is designed specifically for monitoring power supplies, rectifiers, batteries, converters, inverters, UPS's, distribution panels, and AC power at communication sites, base stations, and outdoor enclosures via Ethernet or Wireless connection.

The console software allows system network monitors to consolidate data from numerous locations' Site Power Monitors into a single web interface. Utilizing the console software enables network administrators to view current alarm notification conditions at any one of their remotely monitored sites, combine logged data, and execute firmware updates to several units at once. Additionally, remote sites' alarm level settings can be configured and adjusted from the convenience of one's office.

Site Power Monitor Accessories

SPM Rackmount Bracket allows for 19" and 23" rackmounting of the SPM-200 with two convenient mounting options: Recessed Mount or Front Mount. The SPM-RM occupies only 2 RU (3.5") of vertical rack space.

Optional Sensors available for the SPM-200 are: **Water**, **Door/Window Open Alarm**, and **Fire/Smoke Detector Alarm**.

For more information on the SPM-200, Multi-Site Console Software, SPM Rackmount Bracket or Sensors, please visit us online or e-mail Jeff Wright.

Free Newmar Screwdriver

We would love to hear your feedback on the Newmar News. E-mail us at marketing@newmarpower.com with the subject line "Newsletter" and let us know what you think. Include a mailing address and a Newmar Powering the Network screwdriver will be on its way to you. Thanks!
