Newmar Announces the Addition of Rackmount Trays & Shelves to DC Power Plant Accessories Line

December 5, 2009 – Newport Beach, CA – NEWMAR, supplier of DC Power Plant Systems and components, announces the addition of Rackmount Battery Trays and Equipment Rack Shelves to their line of DC power plant accessories.

NEWMAR's Battery Trays, constructed from heavy gauge cold rolled steel, are ideal for holding up to four 100 amp-hour front terminal batteries and rated at 350 pound capacity. Powder coated in black or gray finish with mounting hardware supplied; the Rackmount Trays are designed to fit standard 19" racks.

Rackmount Equipment Shelves are available in two configurations: Adjustable and Ventilated. The Adjustable Equipment Rack Shelf features variable depth positioning for balancing and desired front projection, and flanged sides for added strength to support up to 200 pounds. The Ventilated Equipment Rack Shelves, feature vent holes in the tray bottom to allow air flow to cool equipment, are designed to hold 150 pounds. Both types are constructed of 16 gauge cold rolled steel with black or gray powder coating, and fit into standard 19" racks. Mounting hardware included.

For more information on the Rackmount Trays and Shelves, please visit Newmar online at www.newmartelecom.com.

Located in Newport Beach, Calif., Newmar has been supplying reliable, high-quality DC power solutions to the telecommunications industry since 1970.
